DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, the prior art of record neither shows or suggests a light-emitting diode display device comprising, in addition to other limitations of the claim, a fluorescent material overlay at a top end of a cavity, wherein the fluorescent material overlay has a thickness that substantially fully converts all light emitted from the LED to fluorescent radiation. Due to their dependency upon independent claim 1, claims 2-7 are also allowable.
3. Regarding independent claim 8, the prior art of record neither shows or suggests a light-emitting diode display device comprising, in addition to other limitations of the claim, a fluorescent material overlay extending over an area at a top end of the cavity, wherein only a portion of the fluorescent material overlay area includes fluorescent material and wherein a second portion of the fluorescent material overlay area co-extensive with the first portion does not have any fluorescent material. Due to their dependency upon independent claim 8, claims 9-13 are also allowable.
4. Regarding independent claim 14, the prior art of record neither shows or suggests a light-emitting diode display device comprising, in addition to other limitations of the claim, a single fluorescent material overlay at a top end of a plurality of cavities. Due to their dependency upon independent claim 14, claims 15-20 are also allowable.

Art Unit: 2879

5. The subject fluorescent material overlay described earlier is provided for maintaining color consistency in multi-LED devices. The design is new and unique to the art.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakada (US 6,774,401) discloses a light-emitting diode with wavelength conversion material layer. Bogner (US 6,649,946) discloses a light source using yellow-to-red-emitting phosphor.
